

## Stage V: Heuristic evaluation

José Pimenta, m37158

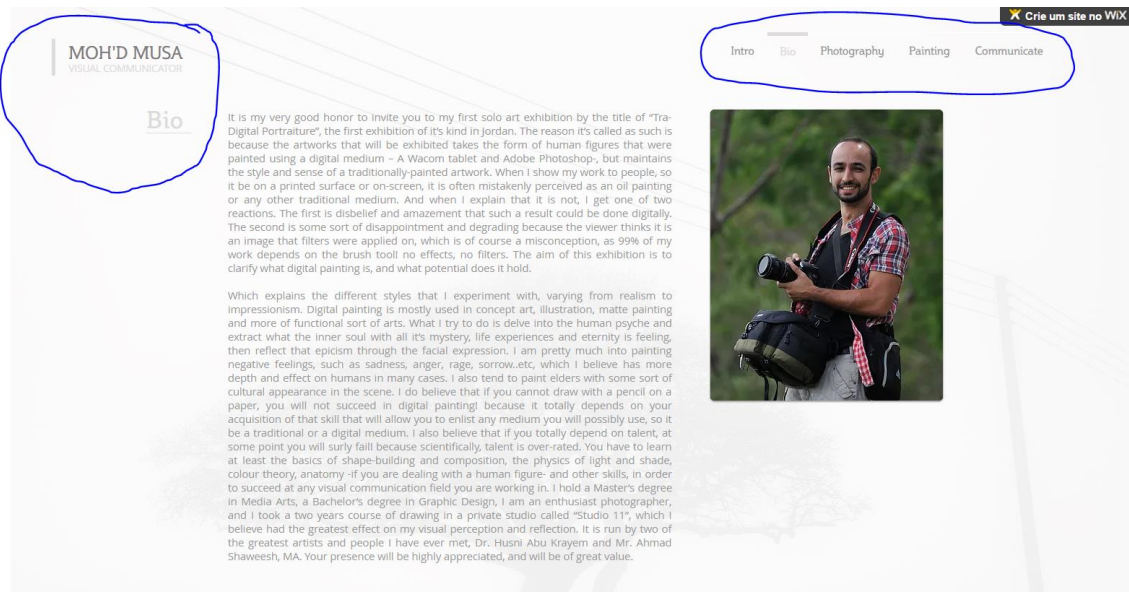

26th of June 2017

### Evaluation of project “MyArtMySite”

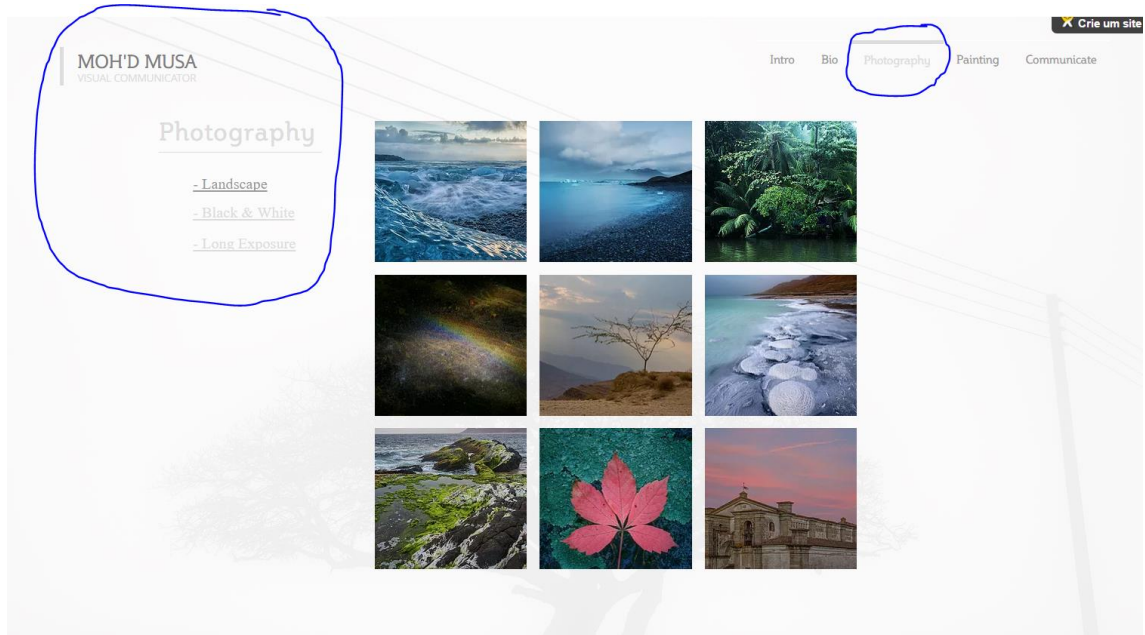

Nº	Problem	Heuristic	Description	Severity	Solution	Screenshot
1	“Enter Website”	Consistency & Standards	The enter website link is not very visible, one person tends to look at the center and being it so small and being at almost the top right, it took some time to find it	High	One solution is to put it at the center, or top center, and a bit bigger	IMAGE1
2	Readability	Consistency & Standards	Sometimes there is text that is hard to read. To have a white background and a shade of grey similar to white, makes it so hard to read, sometimes cannot even read it	High	One solution is to put a shade darker or even go to a blackish color	IMAGE2 And IMAGE3
3	Choice of color	Consistency & Standards	The choice of the color blue for the dropdown menu on the choices on the website seem odd, because the whole website is with colors of white, grey and black	Low	Maintain the theme of the color pallet, so it makes sense for the whole website	IMAGE4
4	Readability	Consistency & Standards	When seeing an image and the text appears below, sometimes it is hard to read, because there is a transparency to the menu of images below.	Medium	Make a black box around the text so it can keep a way to see the menu below but still easy to read text	IMAGE5

## Evaluation of project “EGTG”

Nº	Problem	Heuristic	Description	Severity	Solution	Screenshot
1	“Close the app”	User control & Freedom	When you enter the app, you cannot leave. There is no button to exit the app in the main menu	High	Add a exit button in the main menu	IMAGE6
